Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this report. Only the Client is authorized to permit copying or distribution of this report and then only in its entirety. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test results in this report are relevant only to the sample tested. This report by itself does not imply that the material, product, or service is or has ever been under an Intertek certification program.

LISTING INFORMATION

This product series includes the DGF, DGBF, DGHF, DGT, DGHT, DU, DHU, DHUTF, HHGU, LGU, MGU, HGU, and HUCQ models of joist hangers that connect floor joists to the wood wall. The DG Series feature enough space for drywall to be installed after framing. The DU, HHGU, LGU, MGU, HGU, and HUCQ Series are installed after drywall. The hanger may be installed on either or both sides of a 2 hour fire-rated wood framed wall.

FIRE RATING

1. FIRE WALL HANGERS:

CERTIFIED PRODUCT: Simpson Strong-Tie Co., Inc. DGF, DGBF, DGHF, DGT, DGHT, DU, DHU, DHUTF, HHGU, LGU, MGU, HGU, and HUCQ Fire Wall Hangers

The DG Series features enough space for drywall to be installed before the hanger. The DU Series are installed after drywall. The hangers may be installed in back-to-back construction on min. nominal 2 × 6 wood stud wall, max. 16 in. on center (oc) stud spacing.

- A. Attach the DGF Series Fire Wall Hanger directly to the top wall plates with min. 0.148 in. diameter (min. 1-1/2, max. 3 in. length) nails.
- B. With the DGBF, apply two 1/4 in. beads of fire-resistant mortar caulk, 6 in. long and directly to the top wall plates.
- C. For DU series hangers, gypsum shall be installed first, then mount the DU and DHU with top of hanger flush with top of wall and tight to drywall. Install DHUTF with top flange to top of wall. All DU series hangers shall be attached through the face with SDS 3-1/2 in. × 1/4 in. screws. Attach DHUTF hanger top flange with 10d × 1-1/2 in. nails.

- D. For HHGU, LGU, MGU, HGU, and HUCQ series hangers, gypsum shall be installed first. Hanger shall be attached through the face with number of fasteners per structural ratings.
- E. Attach DGT and DGHT Fire Wall Hanger directly to the top plates with 0.148 diameter min. 1-1/2 in., max. 2-1/2 in. length nails.

2. WOOD FRAMED 2 HOUR FIRE-RATED WALL:

- A. Min. nominal 2 × 4 wood stud wall, max. 16 in. oc stud spacing.
- B. Two layers of 5/8 in., Type X, gypsum installed per Code for 2 hour rated wall. Both layers of drywall shall be notched 1/4 in. wider than the Fire Wall Hanger width, 2-3/4 in. height for the DGF, and 3 in. height for the DGBF and DGHF.
- C. Two layers of 5/8 in., Type X, gypsum installed per Code for 2 hour rated wall for DU, HHGU, LGU, MGU, HGU, and HUCQ series face mounted hanger installation.
- D. Two layers of 5/8 in., Type X, gypsum installed per Code for 2 hour rated wall. Both layers of drywall shall be notched each side of the hanger 2-5/8 in. width, 3 in. height for DGT and DGHT

Consult the listing report on the Directory of Building Products (<https://bpdirectory.intertek.com>) for the edition of the standard(s) evaluated.
