The certificate and schedule are held in force by regular annual surveillance visits by Intertek Testing Services NA, Inc. and the reader or user should contact Intertek to validate its status. This certificate remains the property of Intertek Testing Services NA, Inc. and must be returned to them on demand. This Certificate is for the exclusive use of Intertek's Client and is provided pursuant to the Certification agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this certificate. Only the Client is authorized to permit copying or distribution of this certificate and then only in its entirety. Use of Intertek's Certification mark is restricted to the conditions laid out in the agreement. Any further use of the Intertek name for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. Initial Factory Assessments and Follow up Services are for the purpose of assuring appropriate usage of the Certification mark in accordance with the agreement, they are not for the purposes of production quality control and do not relieve the Client of their obligations in this respect.

Certificate of Compliance WHI19 – 31837713

Appendix A

PRODUCT COVERED

Lexington 60A Minute Rated Composite Core Fire Doors. Any listed wood, aluminum, or steel frames may be used as per frame manufacturers listing(s).

PRODUCT DESCRIPTION

Maximum Sizes:

Single-Swing	4'0" x 8'0"
Temperature Rise	Max 250°F @ 60 mins.

LIMITATIONS

Hardware - Cylindrical or mortise locks, card locks, surface mount hardware, rim exit hardware, concealed closer, concealed door stop, mortise automatic door bottoms, 48 in. x 48 in. maximum surface plates, viewers, louvers, mortise exit devices, pivot and continuous hinges, raceways, electrical strikes, edge guards, dust box, and lay-on or applied molding.

Doors constructed as described in this procedure meet the requirements for both positive and neutral pressure fire tests, UL 10(c) , UBC 7-2 (1997) Part 1, NFPA 252, CAN/ULC S104, UBC 7-2 (1994), and UL 10(b) .

These doors are Category "A" doors (no additional edge sealing system is required).

Doors labeled for positive pressure applications must include installation instructions to be furnished by the door labeler. Unless otherwise noted in the door's installation instructions all intumescent materials and smoke/draft control gasketing used in the assembly are to be installed per their respective manufacturer's instructions.

In neutral pressure applications the intumescent is not required.
